To whom it may concern

obj: Presentation Letter for Nilufar langiboeva application for a PhD Position.

I am writing to recommend Nilufar langiboeva for admission to your Ph.D. program. I had the opportunity to get to know her while she was studying at Ca' Foscari University of Venice.

I first met Mrs. Nilufar last academic year when she was enrolled in my "Managerial Decision Making and Modeling" course. The course requires students to grasp the theoretical concepts of mathematical optimization and apply them to real-world problems. For her final project, she developed a mathematical model in Python to address air traffic management challenges. She earned the highest grade because she demonstrated an excellent understanding of modeling techniques and strong programming skills.

I am currently serving as her Master's thesis supervisor. She is pursuing a Master of Science in Data Analytics for Business and Society, a demanding STEM program classified under LM-91 (Techniques and Methods for the Information Society) in the Italian system. Through her thesis work, she has been demonstrating a solid grasp of the theoretical and practical aspects of mathematical optimization. She is also a skilled programmer who can effectively translate complex ideas into solutions.

What stands out most about Mrs. langiboeva is her consistent curiosity and commitment to learning. She is an independent worker who is willing to engage with unfamiliar or challenging topics. Her ability to conduct thorough bibliographic research and contribute insightful ideas to discussions is impressive.

In addition to her academic strengths, Mrs. langiboeva has practical experience in the IT sector that has further refined her analytical and problem-solving skills. In group settings, which I observed during my course, she collaborates well, demonstrating leadership qualities and helping to guide and motivate her peers during projects.

I believe she has the necessary skills, determination, and academic foundation to succeed in a Ph.D. program and contribute meaningfully to her area of research. I support her application without hesitation.

Please feel free to contact me if you need additional information.

Sincerely,

Raffaele Pesenti
